SPACE FOR INTERACT

Zig-Zag is a **perfect solution** for companies in which the basic role fulfill teams consisting of a few persons who need space to interact freely. Desk tops enlarged by add-on devices provide more space and allow a few people to join the team without any problems and continue collective work. **Module character** of the system and reduced pattern-designing are in accordance with the technical and esthetic needs of contemporary office.

WE
SEE

The area for **team work** is often connected with the mobility of the workers. In this case the crucial element shall provide **fast** and **easy access** to sockets for the workers as well as free communication among the members of the team. Upholstred panels hide media-ports offering place for accessories and trinkets. On the cover of the panels there are openwork containers for documents and additional sources of light. Due to the abovementioned the workstand becomes **more practical**, comfortable and ergonomic.

All elements which constitute the system are a collection of **basic geometric shapes** of a rectangle and a square. Independent and integrated worksatnds are connected with the simple shape of a desk top, differentiated only by the width of the working area. The construction of the desk provides **perfect ergonomics** – a wide area for work, a place for a keyboard and documents , a screen, a telephone and all things which are **essential** for a **modern workstand**.

paper

Zig-Zag **platforms** were designed in such a way to provide quick access and do not cause any problems. That is why they can be exchanged and divide the workstands with a straight or cross-shaped line. The panels are decorated with ornamented openwork covers made of white metal which fastens the partition and provides a **unique character** of the desk.

White metal **openwork** is a characteristic element of the Zig-Zag system. It is designed in a form of zigzags crossing on the frontal parts of the cupboards, embracing the panels or decorating the additional accessories. Apart from that, the **mobile container** with a system of quietly closing drawers and a pen box allows to keep stationery in order.

Zig-Zag cupboard connects esthetics and **elegance** with **ergonomics**. Impressive frontal parts with a zigzag pattern cover perfectly designed interior with huge drawers and shelves for files. The system provides a possibility to chose the frontal part of the cupboard due to the arrangement – despite the most characteristic openwork the frontal parts made of melamine of **elegant shining** HPL material are also available.

SPACE FOR IMPRESS

Is a simple, **multifunctional** and comfortable system which matches various offices. Starting from the reception desk through the open staff rooms to the managers' offices – Zig-Zag creates a **modern office** and provides its unique character.

An opportunity to **concentrate** and have a feeling of **discretion** with being open to the contact with the subordinates is the most crucial element in each office. The workstand for a **manager** in the Zig-Zag system perfectly fulfills these functions and allows to organize work perfectly. Due to handy additional accessories integrated with the desk the most important elements are always accessible.

SPACE TO CREATE

Zig-Zag perfectly functions in a separate area. It is also an optimal place for a small team. **Integrated workstands** lean against the side extensions and allow to organize work in small rooms with a free exchange of ideas to solve problems. The main part of the extension can be used also as an additional place for documents or office equipment. The desks are equipped with media-ports providing comfort and access to electricity.

STYCZEŃ

The partition walls are very useful in a situation when the performed tasks required concentration and silence. Zig-Zag allows to create **independent boxes** consisting of one or a few workstands, separated with additional panels.

The construction of the partition wall allows to assembly various kinds of shelves and additional accessories over the desk. Next to the desk top there is a shuttered cupboard which can be used as a container.

In case of worksatnds which are located in independent Bowes the most crucial thing is a possibility to use the sockets and the Internet without any problems. Zig-Zag desks are equipped with comfortable and **accessible media-ports** allowing for a quick connection of the office equipment with the Internet. Esthetic appearance of the workstand is provided by the canals in the partition walls which hide the cables of the electric and communication network. Due to half-open slats additional devices can be connected without any problems and without the need to disassemble the construction. Additional elements such as hanging shelves or shuttered cupboards complete the system in terms of **functionality** and provide a satisfactory amount of space for documents and files.
